

The most effective teeth whitening
system in the world.

Get a brilliant
white smile,
permanently!

Thousands of dentists agree that the Kör Whitening Deep Bleaching™ System, invented by whitening expert Dr. Rod Kurthy, is the most effective whitening system.

The result is a radiantly white, natural appearing smile.

- Kör Whitening is so effective; it is the only recognized system in the world that will even whiten tetracycline (dark) stained teeth, previously thought to be impossible.
- With easy periodic at-home maintenance your teeth will stay white permanently, even while you continue to drink red wine, coffee, and tea.
- During the whitening process nearly all patients experience only low to typically no teeth sensitivity.

Whitening you can smile about!
